2. Reasons for the revision

In domestic amusement business, there was a firm recovery on investments for Pachisuro related facility. On the other hand, in North American and European gaming market, recovery of demands of our products was recorded in the first quarter. However, it dropped back slightly in the second quarter. Additionally, sales on domestic distribution market were remained flat. Thus, forecast on operating income is expected as lower than initially planned.

Due to foreign exchange fluctuation, foreign exchange loss of 285 million yen was posted due to the diminution in value of foreign-currency-denominated assets. This is the loss of exchange rate at the time of the six year ended September 30, 2010, and therefore, the amount of foreign exchange loss will be changed by exchange rate of the fiscal year ending March 31, 2011 after our determination. Thus, ordinary income and net income are forecasted as lower than initially planned.

(Provided for reference only. Japanese-language original prevails in all cases.)

Additionally, we will immediately notify consolidated financial results forecast for the fiscal year ending March 31, 2011. The Company is planning to pay an interim dividend of 7 yen, and there are no changes.

Note: The above forecasted results have been prepared based on current available information, and actual results may differ from the projections due to the impacts of future events.
