

# Quality and Environmental Policy

1. We strive to enhance customer trust and satisfaction by providing products and services that meet customer needs, while thoroughly preventing quality issues and ensuring their recurrence is avoided.
2. By emphasizing quality in upstream processes, such as product planning and design, we aim to stabilize product quality and improve product reliability.
3. Through the practice of business activities that consider the environment, health, and safety, we endeavor to reduce environmental impact throughout the product lifecycle.
4. By complying with environmental regulations and the requirements of related industries, we do our utmost to prevent environmental pollution and protect the global environment.
5. We are committed to maintaining the effectiveness of our management systems and pursuing continuous improvement.
