

Basic Information Security Policy

Our company applies world-recognized identification and validation technologies to develop, manufacture and sell currency processing machines, financial-related devices and related equipment for amusement centers, targeting both domestic and international markets. As a company that contributes to the safety and trust of society, we regard the protection of information assets as an extremely important management issue. In order to maintain and enhance the trust of our customers, business partners, employees and society as a whole, we work on establishing and continuously improving a system for ensuring information security.

(Scope of the Application)

This policy applies to all information assets (including personal information) related to business operations at all of our company's offices.

(Responsibility of Management)

Our management deeply recognizes that ensuring information security is essential for corporate social responsibility and business continuity, and leads company-wide initiatives to protect information assets.

(Establishment of Internal System)

We establish and operate systems to ensure and achieve ongoing improvement of information security.

(Employee Initiatives)

Our employees understand the importance of information security and work on these efforts as members of our company.

(Compliance with Legal and Contractual Requirements)

Our company regards sincere compliance with laws, regulations, standards, industry guidelines and contractual obligations related to information security as a basic principle of our business activities.

(Response to Violations and Incidents)

In the event of legal violations, contract breaches or accidents (incidents) related to information security, our company establishes a system to respond promptly and appropriately, striving to minimize damage and prevent recurrence.
