## 1. Qualitative information on Quarterly Results

### (1) Explanation of Operating Results

During the third quarter of the current consolidated cumulative period, the global economy showed signs of normalization in economic activity. At the same time, the outlook remains uncertain due to such factors as soaring resource and raw material prices caused by the backdrop of geopolitical risks along with the prolonged conflict between Russia and Ukraine and the unstable situation in the Middle East, as well as the continuation of inflation and monetary tightening in various countries.

Regarding the business environment surrounding the Company and its subsidiaries (hereinafter referred to as the "Group"), demand for capital investment in casino hotels in the North American and European gaming markets, remained high due to the growth of global travel demand. In the domestic and overseas commercial markets, demand for environmental improvements remained strong as contactless and non-face-to-face payment methods, which are becoming the standard in various countries, gained popularity. Furthermore, in Equipment for the domestic amusement industry, sales of peripheral equipment were steady as customers' demand for upgrades to smart gaming machine increased.

In order to meet the strong demand in the gaming market amid these circumstances, we strove to make various proposals in line with customer needs and conducted multifaceted marketing activities, including sales promotion activities for new products. In the commercial market, in addition to meeting strong demand for products due to the increase in inbound tourism demand in Japan, we also made efforts to respond to the reprinting of new banknotes to be issued in July of this year, and overseas, we continued to focus on expanding local distributors including expanding sales channels for new products with a focus on new bases in North, Central and South America, and carried out product proposal activities tailored to the market needs of each country. Furthermore, we conducted sales activities focused on products that are in high demand in equipment for the amusement industry.

For the third quarter of the current consolidated cumulative period, the various factors noted above resulted in net sales of 22,282 million yen (up 17.3% YoY). In terms of profit, operating profit of 1,997 million yen (up 123.8% YoY) due to an increase in net sales and an improvement in profit margins due to the resolution of parts supply shortages and other factors. Ordinary profit of 2,359 million yen (up 62.1% YoY), this was mainly because the Company recorded foreign exchange gains resulting from the depreciation of yen. Profit attributable to owners of the parent was 1,685 million yen (up 43.9% YoY).

During the third quarter of the consolidated cumulative period under review, the average exchange rates were 139.56 yen to the U.S. dollar (129.46 yen in the previous third quarter) and 151.21 yen to the euro (136.68 yen in the previous third quarter). Furthermore, the exchange rate on the final day of the quarter applied to the market valuation at the end of this third quarter of fiscal year was 141.83 yen per U.S. dollar (133.54 yen at the end of the previous fiscal year)

Operating results by segment are as follows.

#### ii. International Commercial
